SHOBHIT BANSAL

Product Engineer | AI-Assisted Builder | Swift | Flutter | Web | Roblox

Mohali, Punjab, India | +91-88376-46949 | shobhitbansal.chd@gmail.com | linkedin.com/in/shobhitbansal2002 | github.com/ShobhitB2002 | shobhitbansal2002.vercel.app

SUMMARY

Product Engineer who takes ideas from zero to shipped. Jugaadu by habit: if it doesn't exist, I birth it. Six personal projects built end to end, from fitness and Asana tools to a Roblox game, a media hub, and this portfolio. I work with cloud and local AI as a structured tool: log everything, diagnose the problem, and keep the judgment in-house.

TECHNICAL SKILLS

Languages: Swift, Objective-C, Dart, Kotlin, JavaScript, HTML/CSS, C/C++, PowerShell, Luau

AI: AI Council: cloud and local models working as one team. Running local LLMs on my own hardware.

PROJECTS

Forge | Flutter | github.com/ShobhitB2002/forge
Offline fitness and nutrition logbook, built because existing apps didn't fit my needs.

Tracket | JavaScript, Asana API | github.com/ShobhitB2002/Tracket
Asana tracker using the Asana API to log and manage my own work history.

Kioku | Dart, Kotlin, C/C++ | In development
Personal media hub combining a tracker, history, and all-in-one player.

NERDVANA | Luau (Roblox)
Roblox survival MMORPG with Albion-style progression.

This Portfolio | Next.js, React, Tailwind CSS | github.com/ShobhitB2002/shobhit-portfolio
Portfolio site built with AI as a tool.

AI Experiment | In development
Building my own LLM.

EDUCATION

MCA, Lovely Professional University (online) | expected 2027

BCA, Swami Vivekanand Institute of Engineering & Technology | 2021-2024
