SUMMARY

iOS Developer with 3 years of experience building and maintaining production apps for HP, Kodak and Polaroid. Owns 10 live App Store apps rated 4.5–4.7★ with 115,000+ US ratings, available in 28 languages; shipped 60+ App Store releases. Specialised in Bluetooth hardware integration (CoreBluetooth, EAAccessory), OTA firmware updates and Core Data offline storage, across both Swift and Objective-C codebases.

TECHNICAL SKILLS

Languages: Swift, Objective-C, Dart
iOS: UIKit, Auto Layout, Core Data, CoreBluetooth, EAAccessory, GCD, ARC, App Store release management
Architecture: MVVM, MVC, Delegation
Debugging: Xcode Instruments, memory leaks, retain cycles, crash analysis
Tools: Xcode, Git, CocoaPods, Swift Package Manager, Firebase, Postman
Cross-platform: Flutter, Method Channels (native iOS bridges)

EXPERIENCE

iOS Developer — C+A Global India, Mohali **Jan 2024 – Present**

- Own development and maintenance of 10 live iOS apps for HP, Kodak and Polaroid printers, including HP Sprocket, Polaroid Zip, Kodak STEP Prints and Polaroid Mint (4.5–4.7★, 115,000+ US ratings, 28 languages).
- Integrated 4 printer models using CoreBluetooth and EAAccessory: device discovery, pairing, command protocol and reliable data transfer. Delivered one model end-to-end in 3 weeks as the sole engineer.
- Built OTA firmware update flows with packet fragmentation, progress tracking and error recovery, working directly with US QA and international hardware teams.
- Implemented an offline-first Core Data layer, reducing network dependency in photo-printing workflows.
- Built photo-editing features shared across apps: gestures, transformations, stickers, frames and text.
- Fixed production crashes, memory leaks and retain cycles using Xcode Instruments; shipped 60+ App Store releases, including iOS 16–18 compatibility updates.
- Maintained and modernised legacy Objective-C code alongside Swift; built Flutter Method Channel bridges exposing native BLE features to a cross-platform app.

iOS Trainee — CS Soft Solutions Pvt. Ltd. **Jul 2023 – Dec 2023**

- Trained in Swift, UIKit, Auto Layout, MVC, ARC, app lifecycle and Core Data.
- Delivered a paid freelance Core Data employee-management app for a Canadian client (GitHub: employeedatabase-ios).

PROJECTS

Cross-Platform Printer App (internal) — Swift, CoreBluetooth, Flutter

- Designed the native iOS BLE architecture and exposed it to Flutter and Android through Method Channels.

Forge (personal) — Flutter, Drift (SQLite) | github.com/ShobhitB2002/forge

- Fitness tracker with workout logging, TDEE and body-composition calculations, progress charts and a 15-table local database.

EDUCATION

MCA, Lovely Professional University (online) — expected 2027
BCA, Swami Vivekanand Institute of Engineering & Technology — 2021–2024
